[†] Moody's is the rating source for the Credit Quality Breakdown Table above. All bond quality ratings are as of 3/31/25. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO), such as Moody's, which evaluates the credit worthiness of an issuer with respect to debt obligations, including specific securities, money market instruments, or other bonds. Ratings are measured on a scale that generally ranges from Aaa (highest grade) to C (lowest grade); ratings are subject to change without notice. Unassigned rating indicates that the debtor was not rated by an NRSRO and should not be interpreted as indicating low quality.
