*This report describes changes to the Fund that occurred during the reporting period.*

**WHAT WERE THE FUND COSTS FOR THE PAST YEAR?** (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Institutional Class	\$85	0.87%

**HOW DID THE FUND PERFORM OVER THE PAST YEAR AND WHAT AFFECTED PERFORMANCE?**

For the 12-month period ended March 31, 2025, the Fund delivered a negative total return on an absolute basis, and underperformed its preferred benchmark, the Russell MidCap® Growth Index.

**WHAT FACTORS INFLUENCED PERFORMANCE?**

It was a difficult period for the Fund with investors bidding up the most expensive and speculative segments of the market. The fastest growing businesses were by far the best performers and were skewed by a small number of stocks. The largest drag was not owning Palantir (PLTR), which we believe is an example of excess. Palantir shares advanced over 265% in the past 12 months and traded at very high multiples of sales and earnings. The company's margins were already at healthy levels, so investors need to make incredibly bullish assumptions for revenue growth to justify the current stock price, much less any future price appreciation. These types of speculative bets with no regard for valuation or downside risk – typically driven by momentum traders and retail investors – are simply out of bounds for our style of investing.
