(BUFTX vs. Russell Midcap Growth Index)

Upside Capture:	81.86
Downside Capture:	103.82
Alpha:	-5.41
Beta:	0.95
Sharpe Ratio:	-0.20

Investment Philosophy

- Utilize long-term, measurable secular growth trends we anticipate to continue for 3-5 years
- Identify premier mid-cap discovery companies with a focus on those with strong management teams, conservative debt, free cash flow, scalable business models with a competitive advantage, increasing margins, and attractive valuations
- 65-85 positions of mid-cap discovery companies. Mid-cap discovery companies are within the range of the Russell Midcap® Growth Index, and are engaged in the pursuit and practical application of knowledge to discover, develop, and commercialize products, services, or intellectual property.

Morningstar Ratings

★★★

Overall Morningstar Rating™ of BUFTX based on risk-adjusted returns among 481 Mid Cap Growth funds as of 3/31/25

Market Capitalization

Micro Cap (<\$1.5B)	0.00%
Small Cap (\$1.5B - \$4.5B)	3.39%
Mid Cap (\$4.5B - \$30B)	51.77%
Large Cap (>\$30B)	44.84%

Growth of \$10,000

This chart illustrates the performance of a hypothetical \$10,000 investment made in the Fund on the Inception Date through 3/31/25. Assumes reinvestment of dividends and capital gains. This chart does not imply future performance.

The Fund's investment objectives, risks, charges, and expenses must be considered carefully before investing. The summary and statutory prospectuses contain this and other important information about the investment company and may be obtained by calling (800) 49-BUFFALO or visiting buffalofunds.com. Read them carefully before investing.

Mutual fund investing involves risk. Principal loss is possible. The Fund invests in small and mid-cap companies, which involve additional risks such as limited liquidity and greater volatility than large-cap companies. The Fund invests in foreign securities which involve greater volatility and political, economic, and currency risks as well as differences in accounting methods.

Effective 7/29/24, the Buffalo Discovery Fund is the Buffalo Mid Cap Discovery Fund.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all 3 rating periods. The Buffalo Mid Cap Discovery Fund (BUFTX) received 3 stars among 481 for the 3-year, 2 stars among 447 for the 5-year, and 3 stars among 358 Mid-Cap Growth funds for the 10-year period ending 3/31/25. © 2025 Morningstar, Inc. The Russell Midcap Growth Index measures the performance of those Russell Midcap companies with higher price-to-book ratios and higher forecasted growth values. One cannot invest directly in an index. Market Cap is the market price of an entire company, calculated by multiplying the number of shares outstanding by the price per share. Free Cash Flow is a measure of how much cash a business generates after accounting for capital expenditures. Turnover Ratio is a measure of the fund's trading activity computed by taking the lesser of purchases or sales (excluding all securities with maturities of less than one year) and dividing by average monthly net assets. A turnover ratio of 100% or more does not necessarily suggest that all securities in the portfolio have been traded. In practical terms, the resulting percentage loosely represents the percentage of the portfolio's holdings that have changed over the past year. Benefits: A low turnover figure (20% to 30%) would indicate a buy-and-hold strategy. Active Share is a measure of the percentage of stock holdings in a manager(s) portfolio that differ from the benchmark index. Market Capture Ratio is a statistical measure of the Fund's overall performance in up-markets (positive return periods) and down-markets (negative return periods). The market capture ratios are used to evaluate how well an investment performed relative to an index during periods when that index has risen or fallen. Alpha is an annualized return measure of how much better or worse a fund's performance is relative to an index of funds in the same category, after allowing for differences in risk. Beta measures the volatility of the fund, as compared to that of the overall market. The market's beta is set at 1.00; a beta higher than 1.00 is considered to be more volatile than the market, while a beta lower than 1.00 is considered to be less volatile. The Sharpe Ratio is a measure for calculating risk-adjusted return. Each Morningstar category average represents a universe of funds with similar objectives. Sector Allocation may not equal 100% due to rounding. *Top Ten Holdings for the quarter are not disclosed until 60 days after quarter end. Those listed are as of 12/31/24. Fund holdings and sector allocations are subject to change and are not recommendations to buy or sell any securities.

Kornitzer Capital Management is the adviser to the Buffalo Funds, which are distributed by Quasar Distributors, LLC.
