## 3 REASONS TO CONSIDER THE BUFFALO INTERNATIONAL FUND

### 1 A Proven Trends-Based Approach to International Growth Investing

We invest in high-quality growth companies that are beneficiaries of secular global growth trends. As such, we tend to be underexposed to cyclical companies that are more sensitive to economic cycles and increase portfolio volatility.

Select examples of the long-term growth trends we invest in:

- ▶ Growing Global Wealth
- ▶ Digitalization
- ▶ Automation
- ▶ Healthy Living
- ▶ Emerging Middle Class
- ▶ Increasing World-Wide Travel

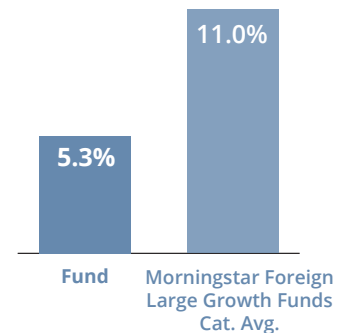

### 2 Higher Risk-Adjusted Returns With Lower Emerging Markets Exposure

The Buffalo International Fund provides diversified exposure to premier international growth companies at attractive valuations and favors companies domiciled in developed markets.

Our investment strategy emphasizes companies with experienced and proven management teams, strong balance sheets, scalable business models with competitive advantages, and a history of high and/or increasing margins.

Accordingly, the Fund generally underweights emerging markets which tend to be less liquid, more volatile and less transparent. The Fund's strategy has delivered attractive risk-adjusted returns over time.

### 3 A Research Intensive, Low-Turnover Portfolio

The Fund is managed with a long-term view, informed by our intensive research. We are patient investors and typically hold positions for a period of 3 to 5 years or more. As a result, the Fund's turnover is significantly lower relative to other funds in our Morningstar category.

### PORTFOLIO TURNOVER

Read them carefully before investing.

**Mutual fund investing involves risk. Principal loss is possible. The Fund invests in small and mid-cap companies, which involve additional risks such as limited liquidity and greater volatility than large-cap companies. The Fund invests in foreign securities which involve greater volatility and political, economic, and currency risks as well as differences in accounting methods.**

The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% 3-year rating for 36-59 months of total returns, 60% 5-year rating/40% 3-year rating for 60-119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all 3 rating periods. The Buffalo International Fund (BUFIX) received 5 stars among 404 for the 3-year, 5 stars among 350 for the 5-year, and 5 stars among 231 Foreign Large Growth funds for the 10-year period ending 3/31/23 based on risk-adjusted returns. © 2023 Morningstar, Inc.
