## WHAT WERE THE FUND COSTS FOR THE PAST YEAR? (based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Institutional Class	\$92	0.86%

## HOW DID THE FUND PERFORM OVER THE PAST YEAR AND WHAT AFFECTED PERFORMANCE?

For the 12-month period ended March 31, 2026, the Fund produced a positive total return on an absolute basis, but underperformed the preferred benchmark, the Russell 3000® Index (the “Index”).

### WHAT FACTORS INFLUENCED PERFORMANCE?

U.S. equity markets advanced meaningfully for the 12-month period, fueled by robust corporate earnings, U.S. Gross Domestic Product (GDP) growth, and a resilient labor market. Megacap technology companies continued to dominate the headlines and led the market rally.

The Fund’s investments within the Energy sector were the largest contributors to positive absolute performance throughout the fiscal year with meaningful impact from specific energy companies like Chevron, Exxon Mobil, and APA Corporation, among others. However, performance compared to the Index lagged largely due to structural portfolio construction differences. The Fund has dividend income characteristics which impacted relative performance compared to the Index, which included a concentration of growth stocks inappropriate for this portfolio.
